

CAR___@Mopar Jim___17" WHEELS/TIRES

The wheels are American Racing VN501s in 17" X 7" with 0 offset. I got them from Summit for \$180 each delivered. The part number is VN50177012500. The tires are BF Goodrich g-Force Comp-2 in 235/55ZR17. Also from Summit and they were about \$112 each delivered. I had a local shop mount and balance them and I am very happy with my choice. My car came with 14" Magnums and power drums all around but I wanted to upgrade to front discs so that required moving up in rim size. I was originally thinking about a set of 15" Magnums but my friends directed me to go this route to take advantage of the excellent modern rubber available at very reasonable prices.
